# easyCAP

## - End termination for insulation systems.

StS has recently developed a new method and product for pipe insulation. The industry has high focus on environmentally friendly solutions and cost-effective installation with superb functionality. easyCAP meet all these demands. easyCAP is an end- termination for insulation systems. We have replaced the traditional steel endcap with a flexible solution that have better properties. With a soft surface, it seals effectively, hindering water ingress, and therefore prevent corrosion under insulation. It is robust to external mechanical stresses, easy to install and leaves no waste during insulation.

# Lambda insulation products

StS Lambda easyFLEX products are designed for quick and easy installation, removal and repeated re-installation to ensure easy access for inspection and maintenance, using minimal manhours, personal protection equipment and tooling.

The products are made from a strong, silicone coated fabric, with a core of insulation and / or other materials depending on use. All seams are sewn with Kevlar reinforced stainless steel thread and sealed with silicone. The outer fabric has no penetrations that could cause water ingress.

**Lambda easyFLEX Pipe Penetration Seal (PPS)** is a custom-made system designed to seal pipe penetrations in A and H classified bulkheads and decks

- HSE: No toxic ingredients, no ceramic fibers
- Low life-cycle costs
- Extreme performance
- Slim building
- Low weight
- High Impact resistance
- No Water absorption
- No maintenance
- Easy to install, remove, inspect, and re-install
- Prefabricated solution → low installation cost
- Single or Multi-Penetrations
- Tested for blast overpressure up to 1.2 bar
- Weatherproof material testing
- Norsok R-004
- IACS UR S.14.2.3

Lambda easyFLEX

# Acoustic, Thermal and Personnel protection covers

## Lambda easyFLEX Acoustic, Thermal and Personnel protection covers

is a multipurpose system used as thermal-, sound- and personnel protection, covering classes 1, 3, 4, 6,7 and 8 according to the NORSOK standard.

The covers are custom made to order to fit a variety of equipment, such as valves, pipes, flanges, actuators and more.

- 
- HSE: No toxic ingredients, no ceramic fibers
  - Low life-cycle costs
  - Extreme performance
  - Slim building
  - Low weight
  - High Impact resistance
  - No Water absorption
  - No maintenance
  - Easy to install, remove, inspect, and re-install
  - Prefabricated solution → low installation cost
  - Combined classes (Norsok 1, 3, 4, 6, 7 and 8)
  - Weatherproof material testing
  - Norsok R-004
  - IACS UR S.14.2.3
  - Acoustic Test A1, B1 and C1
  - ISO 15665:2003

**Lambda easyFLEX BoltCare** is a flexible design for fire protection of flanges and bolts. It can be used on both insulated and uninsulated pipelines.

- 
- HSE: No toxic ingredients, no ceramic fibers
  - Low life-cycle costs
  - Extreme performance
  - Slim build
  - Low weight
  - High Impact resistance
  - No Water absorption
  - No maintenance
  - Easy to install, remove, inspect, and re-install
  - Prefabricated solution → low installation cost
  - Tested for blast overpressure up to 1.2 bar
  - Tested and certified according to
    - IMO Res. A.754(18)
    - OTI 95 634
    - Extended OTI 95 634
    - Norsok R-004 and IACS UR S.14.2.3

Lambda easyFLEX

# Fire and Jet Fire protection

**Lambda easyFLEX Fire and Jet Fire protection** is a system designed to protect pipelines, valves, flanges, actuators, control lines and boxes against fire and / or jet fire.

- HSE: No toxic ingredients, no ceramic fibers
- Low life-cycle costs
- Extreme performance
- Slim building
- Low weight
- High Impact resistance
- No Water absorption
- No maintenance
- Easy to install, remove, inspect, and re-install
- Prefabricated solution → low installation cost
- Tested for blast overpressure up to 1.2 bar
- Tested and certified according to:
  - IMO Res. A.754(18)
  - OTI 95 634
  - Extended OTI 95 634
  - Norsok R-004 and IACS UR S.14.2.3

Lambda easyFLEX

# easyFLEX Firebox

**StS easyFLEX Firebox protection** is a system designed to protect pipelines, valves, flanges, actuators, control lines and boxes against fire and / or jet fire.

The system has been tested successfully for blast overpressure at 0,3 bar, pool fire with a heat load of 200 kW/m<sup>2</sup> and jet fire with heat load up to 350 kW/m<sup>2</sup> (1350°C), and various combination classes and fire scenarios.

The easyFLEX Firebox can be customized according to various requirements of fire loads, explosion forces, scenario durations, continuous operating temperature, mass-to-surface ratio and weight of object to be protected.

- Insulation thickness 11 mm - 21 mm covering all fire scenarios
- Retains fire properties to -190°C
- Retains fire properties over a period of 15 years offshore
- HSE: Non-toxic and emits negligible amounts of smoke when exposed to a fire
- Extremely resilient to water
- Will not expand
- Prefabricated solution → low installation cost
- Tested for blast overpressure up to 0,3 bar
- Tested and certified according to:
  - OTI 95 634
  - Norsok R-004

## Scaffplanner

StS has acquired a new digital tool – Scaffplanner. With Scaffplanner you can better plan scaffolding, detect early phase errors and safeguard workplace safety. Scaffplanner is a plug-in for Autodesk Revit that enables collaboration in scaffold planning. It is a full-fledged BIM (*building information modeling*) tool with smart solutions, that create a complete overview of the scope of the project.

---

*All products are designed and documented to be used in high risk environments such as power plants, process and marine industries, and on- and offshore oil & gas installations. The products have been developed and tested to meet the rigorous requirements of the Norsok and ISO standards.*
